Thanks to your support, SIUT evolved into a comprehensive healthcare system for everything that is kidney and liver related.

Now, once again thanks to your support, we are working to make our Oncology Centre Pakistan’s largest cancer hospital.

SIUT started in 1972 as a small eight bed urology ward at Karachi’s Civil Hospital. Today SIUT is recognised as the largest urology, nephrology, lithotripsy, dialysis and transplantation centre in the region.

Today, our vision extends to eventually encompass non-renal transplantation and robotic surgery with the emphasis on oncology.

At SIUT’s Hamita Suleman Dawood Oncology Centre we have conducted

28,000 surgeries,

51,990 radiotherapy sessions,

26,474 chemotherapy sessions

2,335 brachytherapy sessions and treated over 100,000 cancer patients in the last decade. From 2011 onwards, we have extended our treatment to cover most forms of non-urological forms of cancer, including lung, head & neck and breast cancer.

ALL OF IT FREE.
ALL OF IT WITH DIGNITY.

Once again we ask you to help us turn this vision into a reality. This Ramazan please give your ZAKAT to SIUT.

Aqeela’s story

Aqeela was admitted to SIUT in 2001, suffering from chronic kidney failure. She was forty years old. We put her on dialysis for eight months, after which she underwent a successful kidney transplant and resumed normal life. In fact in 2004 she got married and in 2010 her son was born. Twelve years later, in 2013, she discovered a lump in her breast and came back to us. A biopsy and mammography confirmed that she had breast cancer.

One year later, we conducted a radical mastectomy followed by multiple sessions of chemotherapy and radiotherapy to eradicate the cancer. Earlier this year we conducted a PET scan, which confirmed that Aqeela is now cancer free.

Medical expense borne by SIUT for Aqeela’s treatment: Rs 5.1 million
Costs borne by Aqeela: Rs 0.
